Jeppesen Marketing - 06 - 2010 - 500

Your new OceanView software includes the latest functionalities including Jeppesen Piracy Update. This allows you to download and display pirate activities worldwide, and optionally display as overlay on nautical charts (ENC) together with latest Weather forecasts.C-MAP/ Jeppesen USB eToken is inserted into a USB port.

Piracy Information - Quick Start Guide

A license is required to view the Pirate Information. Once the license is installed in OceanView you are ready to view the Pirate information. Please see section 7.14 in the User's Manual (Toolbar: Help -> Content). If your OceanView system is already licensed you are ready to download and display piracy information.

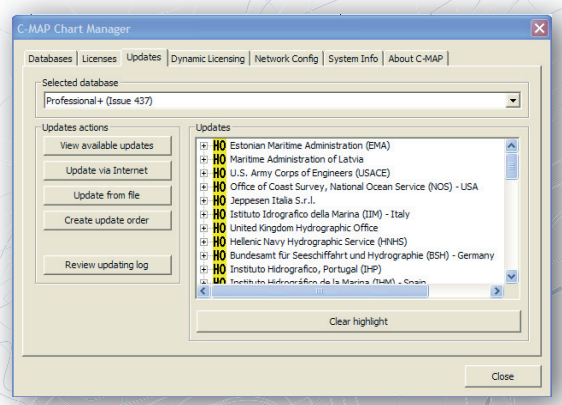
If you do not have a licence, please contact safenav@jeppesen.com

The default connection for OceanView is Internet (HTTP), but there are also four e-mail options available

If you are communicating via e-mail, please contact your IT department to choose your correct e-mail connection type. E-mail requests must be sent to datacenterx@c-map.no. Additional information about e-mail setup are found on in the FAQ-Weather Folder found on the OceanView software DVD

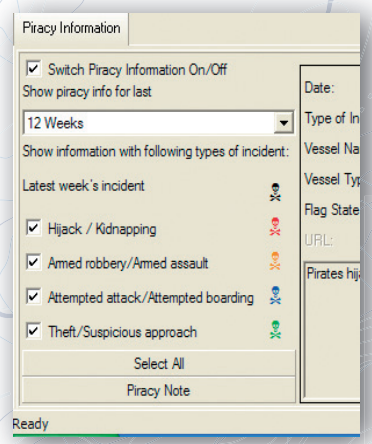
Updating and displaying Piracy Information

Ill 1.: The procedure for obtaining and updating the Piracy Information is the same as for updating your existing OceanView Charts Toolbar: Data -> Chart Management -> Updates -> Update via Internet or Create Update Order (e-mail). Please see end of section 7.14 in the (Toolbar: Help -> Content) manual found in OceanView for this. The Piracy information is updated frequently every weekday.

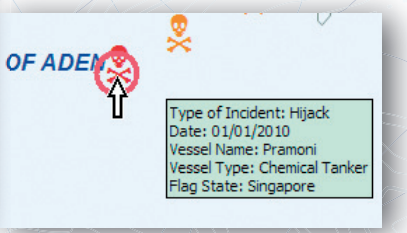


Ill 1.

Ill 2.: Start by activating the Pirate information functionality in toolbar by clicking the Piracy (Skull & Bones) icon in the toolbar or by clicking: Tools -> Piracy Information. The Piracy Information panel opens and you are ready to inspect and study the details. Check on/off in the Piracy Information checkbox to display the Piracy Information in the chart. Incidents are displayed by type, check on/off checkbox(es) to display incidents by type and use drop down menu to choose display period – from 1 week to 1 year.

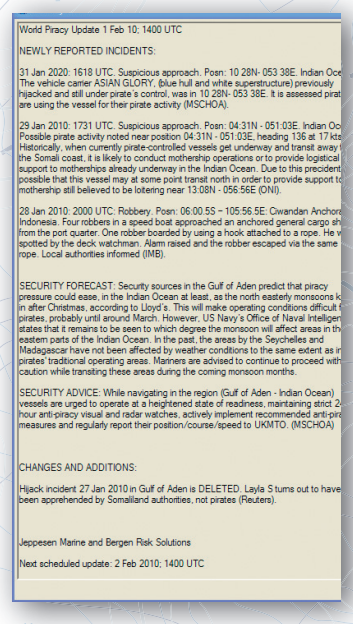


Ill 2.



Ill 3.

Ill 3.: To access all available information about a specific incident, move the cursor over the piracy icon. A tooltip will appear with an incident summary. Please note that the type of data can vary according to intelligence information available.



World Piracy Update 1 Feb 10; 1400 UTC
NEWLY REPORTED INCIDENTS:
SECURITY FORECAST:
SECURITY ADVICE:
CHANGES AND ADDITIONS:
Jeppesen Marine and Bergen Risk Solutions
Next scheduled update: 2 Feb 2010; 1400 UTC

Ill 4.

Ill 4.: To access all information available, right-click the icon (click on crossed bones) and the additional information (if available) will be displayed in the Piracy Information Panel. After right clicking (any) icon, you can also access the Piracy Note (general information and situation report) by clicking the "Piracy Note" button in the lower left corner of the Piracy Information Panel.

Final Note:

Knowing that pirates do not operate during certain weather conditions (i.e. wave height) the Weather information (if subscribed to) in OceanView can give strong indications for navigators and operators as to where pirates does NOT operate due to (i.e) too high waves

For further information about OceanView or the Piracy information, please contact safenav@jeppesen.com
